

# Copper Ridge East

## September 1, 2021

Meet organizer, course planner : Craig Brooks

Assistance from Benoit Turcotte, Dave Hildes, Bryn Knight.

A sunny and cooler day greeted 41 orienteers, many doing courses higher than their usual.

Copper Ridge east is green/light in part, and lighter green in other places. Many cutlines, former power lines, and trail network created some challenges, and lots of boulders and knolls.

With the green, courses were a little shorter than usual, with Forest Pearson taking the top Elite time.

Expert and Advanced courses had a misplaced control flag (but the ribbon was in the right place!). Later research indicated the existence of a parallel hill, not on the map, reinforcing our “there is no perfect map” (or course planner!). The map is being updated in that area for future use. Some found the flag, others found the ribbons, others found both, about 50 metres apart.

Thanks to the owners of Lobird for permission to pass through their property to access the trail network.

The organizers also recognize part of the map used for this event is KDFN settlement land, used under a Land Use Agreement between YOA and KDFN.
