

Mount Lorne, May 27, 2023, Long Event

The second B meet of the Lorne Mountain O'Fest weekend saw longer courses on the very flat and very open Mt. Lorne map. Highest elevation gain was from the final control to the finish!

As an active wood cutting, skiing and biking area, many new and indistinct trails created some challenges. Some courses got views of the historic Annie Lake golf course, while most courses got to sample Mt Lorne's high marshes.

The expert courses saw a battle for first with Caelan McLean just edging out Forest Pearson.

Thanks for Jeanne Burke, Bob Sagar, Dave Hildes and Erik Blake (and any I've forgot) for their assistance. Also thanks for Colin Abbott, who fixed a misplaced control (organizers parallel error!) on the Advanced/Expert course early in the meet.

Some ran multiple courses.
